SUBSTRATES

EASY-CLEAN HINGES

The Easy-Clean hinges enable the sash to be opened at 90 degrees

By pressing down on the purple button, the sash is released and can slide along its runner

This now gives access to the front of the sash from indoors for cleaning.

OPTIONAL FINISHES

A wide range of foil options are available for either or both internal and external faces or even differing frames and sashes.

NRG70 sculpturedSASH

ROLLER KEEPS

Bi-directional roller locks and their corresponding keeps use two slots to allow for a secure night ventilation latch position.

HANDLE

A choice of stylish key-lockable handles in a variety of colours can be specified.

ROLLER LOCK

Bi-directional roller locks slide outwards into their respective keeps.

SHOOTBOLTS

Each sash incorporates shootbolts at each end for increased security.

TOP HUNG HINGE

Top hung sashes have stainless-steel friction stays as standard.

PULL-IN BLOCK

Optimises compression on the window seals when closing

OPTIONAL HINGE BOLT

For complete multi-point locking

NRG70 sculpturedSASH

PlatinumNRG is one of the best performing products on the market, taking full advantage of the increased thermal efficiency offered by its 6-chamber profile.

sculpturedSASH is the perfect partner to our unique Alumina® Residential Door system

PlatinumNRG windows are easily recycled at the end of their lives due to their use of structural PVCu. Most windows still use steel for reinforcement which prevents their future re-cycling. This leaves them destined for landfills due to being non-degradable.

PlatinumNRG windows use environmentally-friendly PVC-u with Calcium Organic stabilisers rather than the poisonous Lead used by other PVC-u windows in the UK. Also, when recycled, there are no dangerous bi-products.
